Price and Tecnological superiority

One single absorber
SELECTIVE Titanium
 sheet totally from
 aluminium with
 absorption coefficient
 $a \geq 0,95 \pm 0,02$ and
 emission coefficient
 $e \leq 0,05 \pm 0,02$

- ✓ External casing made from shipbuilding aluminium for guaranteed durability against UV, in coastal areas and in humid climates.
- ✓ Hot water even during the frozen days of the winter with minimum sunshine because of the strong polyurethane foam (density 45kg/m³) and the high efficiency of the collector.
- ✓ Anticorrosion protection with double enameling and magnesium rod for long life.
- ✓ Collector of high performance with one single absorber **SELECTIVE** Titanium sheet totally from aluminium and unbreakable solar glass for greater durability even at hailstorm.
- ✓ The perfect external design of the Solar Water Heater combined with the sophisticated support base offer the possibility of an easy installation of the system well –attached on inclined roof, matching ideally with every architectural construction.
